DESCRIPTORS	*College Graduates; *College Outcomes Assessment; *College Transfer Students; Community Colleges; Evaluation; *Job Placement; Job Training; *Outcomes of Education; Success; Transfer Programs; Transfer Rates (College); Two Year Colleges
IDENTIFIERS	*Community College of Rhode Island

ABSTRACT

The primary mission of the Community College of Rhode Island (CCRI) is to help students succeed in reaching their educational goals by preparing them to enter the workforce or transfer to a 4-year college or university. Each year, CCRI surveys the previous year's graduates as a way of measuring success. About 1,379 members of the class of 2001 were asked to provide information about place of employment, job title, salary, and status of continuing education. Also, 1,126 (81.7%) responded to the survey. The report indicates 517, or 45.9%, of graduates were employed full-time; 126 (11.2%) were employed full-time and going to school part-time; 106 (9.4%) were employed part-time, 20 (1.8%) were unavailable for employment; 55 (4.9%) were unemployed and searching; 112 (9.9%) were in school full-time; and 190 (16.9%) were in school full-time and working part-time. More than 93% of respondents were employed, continuing their education, or both. The report breaks down employment and transfer status into 26 different programs and departments, ranging from Business Administration to Liberal Arts and Technical Studies. Average salaries reported are based on a 40-hour week and are reported only for education-related employment. Research instrument appended. (NB)

The true measure of CCRI's success ...

"The experience I got in my classes and in my clinical training at CCRI prepared me well to move right into my career."

James A. Webb
Class of 2001
Radiography
X-ray Technologist, Kent Hospital

"The support provided by the professors at CCRI was as critical to my success as the course material they taught."

Carol L. Smith
Class of 2000
Computer Networking
Technical Specialist, Fleet Capital Leasing

"The Community College of Rhode Island provided me with an exceptional foundation on which to build my career."

Marilyn E. Asselin, Ph.D. RNC
Class of 1974
Nursing
Director, Dept. of Education, Kent Hospital

Introduction

Look at the people around you. As you go through a typical day, notice the teachers in the schools and day care centers, the police officers and firefighters in your neighborhood, the health professionals in the hospitals and medical offices, the professionals in the office buildings, the computer specialists and technicians working in companies across the state, elected officials, your co-workers. Chances are, many of the people you depend upon every day have benefited from the Community College of Rhode Island. With an enrollment of 16,000 students each semester, CCRI touches the lives of most Rhode Island families.

Each year, between 1,200 and 1,700 Rhode Islanders graduate from CCRI and thousands more come to the college to take a course or two as part of their lifelong learning endeavors. Currently, our graduates total more than 46,000, most of them living and working in this state. It could be said that they are the backbone of the Rhode Island economy – the company CEOs and lawyers, educators, health care professionals, technicians, manufacturers and service workers that keep the Ocean State afloat.

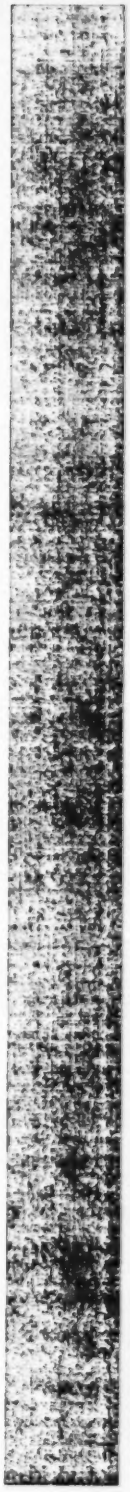
Many of our graduates also choose to continue their education by transferring to another school. This class was no exception. Of those responding to the survey, 27% indicated they were attending school full time and another 10% part time. Whether students transfer before completing a degree at CCRI or upon completion as highlighted in this report, the transfer function is performing very effectively in meeting the needs of our students. As indicated on the following page, graduates of the Class of 2002 are continuing their studies at a variety of colleges across the country.

Established in 1964 to give all Rhode Islanders an opportunity to achieve their educational goals, CCRI remains committed to helping every student succeed. The college serves recent high school graduates, older adults looking for a new career, recent immigrants and businesses looking to give their employees the training they need to remain competitive in a global economy.

Where the class of 2002 is studying

Air Force Technical School
Bridgewater State College
Bryant College
California College of Arts and Crafts
Central Connecticut State University
Community College of Rhode Island
Dean College
Eastern Connecticut State University
Green Mountain College
Hawaii University
Houghton College
Johnson and Wales University
Katherine Gibbs School
Middlesex Community College
New England Institute of Technology
New Horizon Computer Learning Center
Nichols College
Northeastern University
Providence College
Rhode Island College
Rhode Island School of Design
Roger Williams University
Salve Regina University
Stonehill College
University of Albany
University of Massachusetts
University of Massachusetts-Dartmouth
University of New Haven
University of Rhode Island
University of South Florida
Worcester State College

This list constitutes full-time students continuing their education only and does not include the continuing studies of part-time students.
Over 27% of CCRI graduates are continuing their education full time. Many more students transfer to these and other schools as full-time students before graduating from CCRI.



9

Meeting Expectations

CCRI's primary mission is to help students succeed in reaching their educational goals by preparing them to enter the workforce or transfer to a four-year college or university. Each year the college attempts to measure its success in this regard by surveying the previous year's graduates.

This year the 1,369 members of the Class of 2002 were asked to provide information about place of employment, job title, salary and status of continuing education. Of those, 1,079, or 78.8%, responded to the survey. The results indicate that, overwhelmingly, CCRI graduates succeeded in reaching their educational goals. In fact, *more than 95%* are employed, continuing their education or a combination of both.

A total of 624 graduates reported that they are working full time, with another 334 employed on a part-time basis (221 of those working part time are also continuing their education).* Also, 293 graduates are attending school full time; 39.9 percent of these are attending Rhode Island College and 24.2 percent are studying at the University of Rhode Island. Members of the Class of 2002 transferred to more than 30 colleges and universities.

* Range and average of salaries reported by employed graduates may vary from year to year based on salary levels that may have existed prior to obtaining the degree or certificate.

Survey Statistics for Class of 2002

1,369	**GRADUATES**	
1,079	**RESPONDING**	**78.8%**
515	Employed Full-Time	47.7%
109	Employed Full-Time/Education Part-Time	10.1%
113	Employed Part-Time	10.5%
18	Unavailable for Employment	1.7%
31	Unemployed and Searching	2.9%
72	Education Full-Time	6.7%
221	Education Full-Time/Employed Part-Time	20.5%
	Total Employed, Continuing their Education, or a Combination of Both	**95.5%**

About this report ...

Since the *Career Placement and Graduate Transfer Report* is based on a self-report survey, some caution in interpretation is suggested. In looking at the data, please be advised that average salaries, based on a 40-hour week, are reported only for educational-related employment and may show an unexpectedly broad range due to data collected from both graduates in entry-level positions and professionally employed graduates who attended CCRI for further professional development.

The overall results from this year's survey again validates, as have all reports since 1985, CCRI's success in preparing graduates for further education as well as for jobs in the Rhode Island economy.

Business Administration

Robert and Katherine Cottrell Class of 2002

The Business Administration program focuses on providing students with a solid academic background in business as well as specialized training in a variety of areas. Students receive a solid foundation in management, marketing, accounting, retail management, finance/banking, entrepreneurship and real estate. They also learn critical thinking, problem solving and decision-making skills. A cooperative education option offers students an opportunity to gain work experience while in school.

Cardio-Respiratory Care

The Cardio-Respiratory Care program is an accredited two-year respiratory therapist program leading to an A.A.S. degree. Respiratory Care is an allied health profession in which respiratory therapists work under the direction of a physician to evaluate, treat and care for patients with breathing disorders. During the course of study, the student attends clinical practice at various affiliate sites including specialty rotations in neonatal and pediatric care, pulmonary function testing, hemodynamics, subacute/chronic care, pulmonary rehabilitation and home care. Graduates must pass a national entry-level examination and are eligible to sit for the advanced-level credential (RRT). Respiratory care practitioners are licensed in the state of Rhode Island and are employed in hospitals, nursing facilities, clinics, doctors' offices, home care companies and rehabilitation centers.

Chemical Technology

The Chemical Technology Program integrates experimentation, lecture and recitation materials to produce a unified presentation of analytical, inorganic, organic and industrial chemistries. It is designed for students who are more interested in the application of science than the mathematical descriptions of theoretical concepts. The program is accredited by the American Chemical Society. Graduates from the program find employment in areas ranging from aerospace and biochemistry to pollution control and zinc metallurgy.

Clinical Laboratory Technology

Clinical laboratory technicians perform all of the routine tests in an up-to-date medical laboratory. The technician is required to know specific techniques and instruments. The CLT Program is a two-year program that includes clinical training. At the end of this experience, students are eligible to take a certification examination to become licensed by the State of Rhode Island. Graduates work in private laboratories, doctors' office laboratories, hospital labs, research, sales and commercial laboratories.

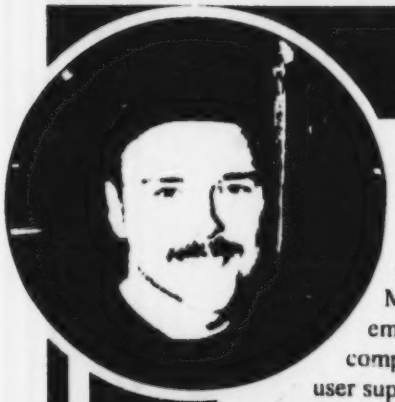
Computer Studies



Barry Godfrey Class of 2002

CCRI offers two Associate in Science degree programs in the computer area. The Computer Programming degree program prepares the student to enter a modern programming environment. It stresses problem definition and solution design using different programming languages in the development of applications. The Microcomputing degree program prepares the student to enter a workplace that emphasizes the use of the personal computer as a stand-alone device or in a networked computer environment. This program prepares an individual to be employed in computer user support services. The college also offers one-year certificate options, which emphasize technical work only, for students who already hold a Bachelor's Degree or have experience in a computer-oriented profession. The career paths of graduates have been changing in recent years; instead of working in programming positions which typically lead to systems analysts positions at banks or insurance companies, students are going to work for major companies to staff the "help desk."

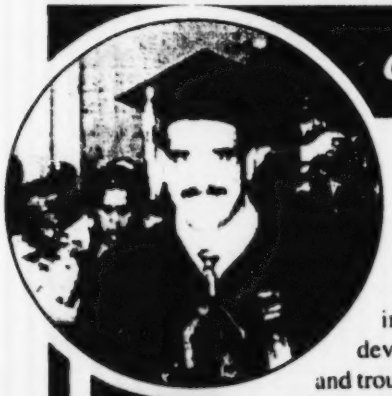
Computer & Networking Maintenance



Peter Bartis Class of 2002

Opportunities for individuals skilled in the installation, support and trouble-shooting of computers and computer networks continue to increase. This certificate provides a balanced coverage of technology fundamentals, computer hardware, computer software, and networking technology. An emphasis is placed on operating principles of hardware and software, networking models, operating systems, internetworking components, industry standards and hands-on laboratory activities for developing practical problem-solving skills. Students will develop the ability to configure and troubleshoot basic PCs, local area networks (LANs) and internetworks using routers and switches. Integrated into the program are courses that prepare the student to sit for both the Cisco CCNA examination and the CompTIA A+ certification for computer maintenance. Most of the courses in this certificate program transfer towards an associate degree in Computer and Networking Technology and to a lesser extent, an associate degree in Telecommunications Technology. This program prepares students for employment as computer technicians, computer personnel, and network administrators and network installers.

Criminal Justice & Legal Studies

The Criminal Justice and Legal Studies program is designed to provide students with the academic courses and specialized training required for a law enforcement career or a paralegal position. The program meets the requirements established by many police departments which mandate 60 hours of college course work in law enforcement for new hires. The Legal Studies Program prepares students to become paralegals for the legal profession and the business community.

Dental Assisting

The CCRI Dental Assisting Program is a one-year program accredited by the American Dental Association's Commission on Dental Accreditation. The majority of dental assistants are employed by general dentists, providing chairside assistance. Additionally, some are employed in specialty practices such as orthodontics and oral surgery.

Engineering

The Engineering Program is designed to provide a firm background in basic engineering principles. Students who successfully complete the program may transfer to a four-year institution or go directly into employment as an engineering assistant. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses.

Engineering Technology

CCRI has three Engineering Technology programs. The Electronic Engineering Technology program educates students as technicians in the design, development and testing of engineering models and systems. Graduates of this program pursue careers as engineering associates, engineering aides in research and development, field engineers, sales engineers, engineering technicians, technical writers and assistant production managers in the electronics industry. Due to the increasing complexity of electrical and electronic equipment, many students decide to expand their knowledge by pursuing a four-year degree in engineering technology.

The Mechanical Engineering Technology program trains students to convert engineering theory into working plans in order to solve real world problems. The students study traditional engineering subjects such as physics, math, statics, materials and mechanisms as well as taking courses in the areas of robotics, tool design, quality control, CAD, production planning and cost estimating. Graduates are qualified to seek employment in the design as well as the manufacturing or industrial engineering areas.

The Computer Engineering Technology program offers students a chance to acquire a heavier concentration in computer education. Computer engineering technicians are needed to assist engineers in the design, development and testing of new devices, and they are needed to install, operate and maintain computer equipment. In industry they may be found in design, in sales, in research and development, or in the field providing technical information and service to the users of computer engineering technology.

Fine Arts

CCRI offers the Associate in Fine Arts degree in Art, Jazz Studies, Music and Theatre. These programs serve both students transferring to a four-year college or professional school and students who wish to pursue a career. They provide hands-on experience in the first two years of higher education, a strong foundation in the humanities and exposure to interdisciplinary study. CCRI offers the only Jazz Studies program in Rhode Island and the only theatre program which offers jazz, ballet and modern dance. Students in the theatre program develop skills and creativity in the areas of acting, musical theatre, technical theatre and communications. Visual arts students focus on ceramics, computer technology, graphic design, and photography. Music students may concentrate on performance, teaching, communications, composition or the music business.

Fire Science

The Fire Science program is designed for individuals who wish to enter the firefighting profession. It provides leadership skills, technical knowledge and Emergency Medical Technician (EMT-B) qualifications needed to be successful in the fire service. The curriculum strengthens the knowledge base of the current professional firefighter and augments expertise practiced in the community.

Human Services

Wilfred Kenworthy Class of 2002

Human service workers perform in a variety of educational and therapeutic settings with individuals, groups and families. Students receive an education which combines competency-based training specific to each education and social service concentration with supervised field work internships. Graduates may continue their education or enter the human service delivery system as child care and special needs professionals, social work case aides, assistant teachers, residential care providers, substance abuse counselors and gerontology activity professionals.

Liberal Arts

Holly Osberg
Class of 2002

The Liberal Arts degree program is designed for students intending to transfer to baccalaureate degree programs following graduation from CCRI. It requires coursework in English composition including research writing, mathematics and laboratory sciences, history and the social sciences, and the fine arts and languages. Graduates transfer most often to Rhode Island College and the University of Rhode Island, although CCRI also has agreements with more than 60 baccalaureate colleges and universities throughout New England. These agreements guarantee admission and junior year status to CCRI liberal arts graduates with satisfactory grades. These colleges include Bryant College, Salve Regina University, Roger Williams University, Boston University, University of Massachusetts - Dartmouth, Stonehill College, Worcester State College and Suffolk University.

Nursing (Licensed Practical)

The Practical Nurse program is part of the articulated nursing program. Once accepted into the program, students can complete the requirements for graduation within 11 months and are eligible for the licensing examination for practical nursing. Graduates of this program are quickly assimilated into the health care field and work in a variety of health care settings. As a graduate of this program, the licensed practical nurse may return within five years and complete the requirements necessary to receive an associate degree in science for registered nurse in one year.

Occupational Therapy Assistant

The Occupational Therapy Assistant program includes 72 credits of general education and occupational therapy courses. Occupational therapy is the use of purposeful activity and interventions to promote health and achieve functional outcomes in performance areas, which include activities of daily living, work and productive activities, and play or leisure activities. Occupational therapy assistants, under the supervision of a registered occupational therapist, help people of all ages to lead productive, satisfying lives.

Office Administration

The Office Administration programs are designed to emphasize a variety of computer tasks created by new technologies as well as traditional office tasks. With the shift of work responsibility from middle management, the role of the office professional has become critical. The department's programs have been developed to address changing workplace requirements. Program options include administrative assistant/secretary, legal administrative assistant/secretary and medical administrative assistant/secretary. In addition, the department also offers a Travel and Tourism program. Cooperative education experience is available to students.

Phlebotomy

A phlebotomist is an individual who obtains blood samples for clinical laboratory testing. The program at CCRI consists of two semesters, including 160 hours of clinical training at an affiliated site (hospital, private lab or clinic). Students must pass a national certification examination. Phlebotomists are employed in private laboratories, doctors' office laboratories, hospital labs, clinics and emergency rooms.

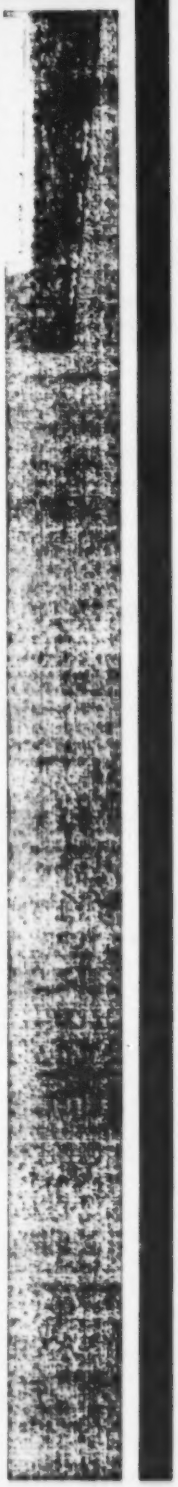
Radiography



A radiographer is a person who uses x-radiation, a knowledge of anatomy, and imaging principles to aid physicians in the diagnosis of disease, in monitoring patient progress and in controlled screenings to help prevent disease. A radiographer works in hospitals, clinics, doctors' offices, and private emergency rooms. The profession offers numerous opportunities for advancement, including computed tomography and special procedures. With one year of additional education, there are opportunities in MRI, medical ultrasonography, nuclear medicine and radiation therapy.

Retail Management

The Retail Management program is designed to prepare students for careers in mass merchandising or fashion merchandising. A major component of the program is the cooperative work experience in which students are employed in retail establishments throughout the state. Graduates obtain employment in department stores, specialty shops, chains, catalog showrooms, and off-price stores. Within each type of store there are career opportunities in merchandising, buying, management, sales promotion, human resources, loss prevention, real estate, operations, distribution, finance and accounting.

Therapeutic Massage

Therapeutic massage involves the use of manual soft tissue mobilization to promote health and wellness. Recent scientific studies have documented the many positive physical, mental and emotional effects of massage. The Therapeutic Massage program offers students a strong scientific basis for the understanding and application of various soft tissue techniques. Various types of massage are studied, including both Eastern and Western approaches. The Therapeutic Massage program comprises 68 credits including general education and therapeutic massage courses leading to an Associate's Degree. A certificate option consisting of 44 credits is available for students who already have a degree in a health field.
